August 26, 1988 Issue 451

DXpedition News

China - BY Mike NS7Z is again in China on business. He hopes to be on as BY1PK 11-1500Z, on 10, 15, or 40 meters, depending on band conditions, with 20 meters last choice. Perhaps different hours on the weekends. QSL home call.

Hong Kong - VS K9EL will be /VS6 Sept. 1-3, on 20 CW, around 14020 kHz. QSL K9EL.

Minami Torishima - JD Bob KD7P hopes to be on as KA2MI Sept. 16-23, depending on military transport. Details to follow.

Trindade - PY0T A group of Brazilian amateurs have permission to operate /PY0T the second week in October. Watch 14195, 21295, 28455, 7085, and 3790-95 kHz. No CW frequencies given. Some ops are PT2ACC, PP2JDS, PP2JK, and PP2JW.

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Oblast 185 Look for UI8IF/UI8Q, UI8IAY/UI8Q and UI8IAQ/UI8Q now to Sept. 1, all bands on CW. QSL to Valery N. Volkov UI8IAJ, P.O.Box 71, Samarkand 703000 Uzber SSR, USSR, with SAE and two IRCs.

Cyprus - 5B4 LA6EDA/5B4 will be on SSB through Sept. 10, thanks to Mike 5B4TI. Watch 06-08Z, 14-17Z, and 20-22Z, on 28500, 21200, 21300, and 14200-250. Low bands possible as well. He'll work by call areas or take his own list by last two letters if needed. No break-ins, please. QSL after his return with SAE and IRCs or US$1, or expect bureau return.

Yemen - 4W The Lynx DX Bulletin reports that the 4W0EA operation has the necessary visa, which expires Oct. 21. Operation will be toward the end of this period. Stand by.

Reserve Your Island

- Doc W9NSZ will be on as KP2/W9NSZ Oct. 27-31, especially for CQWW SSB. QSL home call. He's looking for a laptop computer for logging. Any help?
- Jim K8JRK will be on as T28RK in CQWW SSB, maybe 15-meter single band, listening up 3-7 kHz. YL T20LJ may share the rig. QSL home call after Nov. 20.
- Bruce Butler will be SV5/W6OSP in the CQWW CW test, 25 kHz up. Before the test, he'll be on SSB on 14195 or 21250 kHz, listening up 5-10. QSL AE6H, with SASE or SAE and US$1 preferred.
- 8P9X is the call of Dixie DXers K3KG, K3ZR and K4FJ in the CQWW SSB test, multi-single. QSL K4FJ.
- V47Z will be a Dixie DXer multi-op entry in both CQWW SSB and CW. QSL to W4MGX.

Shortly Noted

- IK6BAK/B is a beacon on 24915 kHz. Location is grid square JN63.
- Stations currently active from Franz Josef Land are RZ1OWA and UA0BDU/UA1O, mostly CW below 14025 kHz.
- YF1OB says Indonesia ran out of YC1 calls, and they have over-flowed into YF1.
- St. Martin stations now have official FS calls, such as FS5UQ (active on RTTY) and FS5YL.
- YN3EO is on most every day on 14195 or 14005 kHz. He skeds QSL manager Y32KE Fridays at 0200Z on 14195 kHz.
- The UN observers monitoring the cease-fire in Iran and Iraq may get on the air. The DXCC desk has accepted these stations in the past. If you hear a /EP or /YI, work 'em!
- While the propagation reports on WWV at 18 minutes after the hour have been off the air, DXers can keep current on solar data by calling the recording at (303) 497-3235.
- 40 meter regulars are 3B8CF 7005 kHz 1400Z; 5W1HC 7007 kHz 10-1100Z; and VU2TEC on 7006 kHz after 1230Z.
- On 20 meter SSB, watch for: 3B9FR after 1130Z; 5V7WD after 0545Z, 9M2CW 14183 kHz at 1350Z; AP2ZA after 0000Z; EP2DL 14160 kHz at 2300Z; FR5DX 14200 kHz +/- after 1130Z; YI1BGD 14205-220 kHz after 2300Z, and T20AA 14210-240 kHz after 1230Z.
- 15 meter CW regulars are: 9J2KF 21011 1745Z+; TU4CO 21010 kHz 2100Z; and 5W1HC 21028 kHz 0100Z.
- On 15 SSB, try: 4S7PVR 21300-315, 1745-1900Z; 9J2AL 21266 at 1845Z+; 9N1RN 21250-300 kHz 1500Z+; D44BC 21230 kHz at 1900Z; FH5EF 21245-280 kHz 1700Z; J52US at 1900Z; S79MX 21345 kHz after 1940Z; TL8HW 21300-350 1900Z+; and VR6ID 21280 at 1700Z.

Propagation Watch

The solar flux plummeted to only 115 on August 20, well below the 90-day mean of 147, and way down from the 180 levels that characterized much of July. The geomagnetic field has been relatively quiet, however, so band conditions did not degrade as severely as the solar flux dropped.

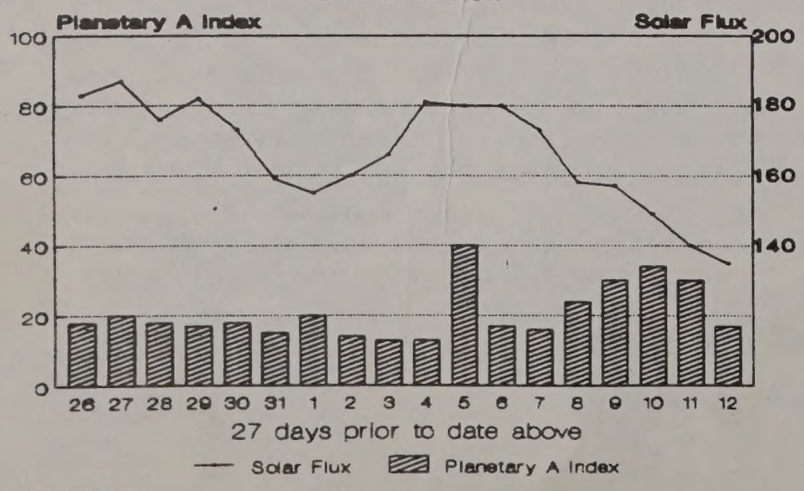
With the exception of some minor storm levels in the high latitudes, which adversely affect the polar and long paths, the quiet geomagnetic field has permitted good DXing on 15 and 20 meters.

On all but the worst days of the month, the DXer can expect a good long-path opening on 20 meters around local dawn, with 15 meters opening to the northeast soon after. Propagation favors 15 meters most of the day, swing to the south and then west with the sun. As the maximum usable frequency drops around local sunset, 20 meters picks up, and stays open essentially all night, to some part of the world. In the absence of QRN, 40 meters also offers good DX during the night. (So should 30 meters!)

The low solar activity has prevented 10 and 12 meters from providing any but the most routine, north-south openings, but keep an eye on these bands as solar flux recovers in the next few weeks.

Overall, the next two weeks should provide above average summer DXing, except for Sept. 5. It only gets better as we approach the Fall DX season, which is likely to be the best in several years!

Solar Data



DXCC News

The ARRL DXCC desk reports that the A61AB CW operation in March 1988 by Jacky F2CW/7J1ADX (see DX column in Sept. 73 mag.) is acceptable for DXCC credit, beginning with applications received June 13. A lot of DXers got a new one on CW, thanks to Jacky!

Also, the DXCC desk has announced the top ten 10-meter single band DXCC recipients. They are: W4DR/317, G3KMA/315, K2FL/315, K4DY/308, K20LG/298, K2ARO/297, W9ZR/297, JG1NBD/296, K3BEQ/295, and N4WW/294. Congratulations to these hard-working 10-meter enthusiasts! (Thanks ARRL Letter.)

DX Advisory Committee News

The DXAC will probably vote next month on the suggestion to lower the "steps" in the RTTY DXCC award from the present 25 to a smaller number, similar to the steps in the new single-band DXCC awards. The RTTY gang is solidly behind this proposal, and it will most likely pass.

Also tentatively scheduled for a September vote is the application to reinstate Okino Tori Shima, the non-island that Japan is spending millions of dollars (billions of yen?) rebuilding. If the island were allowed to erode to the point where nothing is above high tide, Japan would lose exclusive rights to thousands of square miles of valuable fishing and undersea mining territory. But merely building a wall around the island will not change the fact that it lies less than 225 miles from Ogasawara. Don't expect a return of Baldwin's Reef.

The applicant for separate country status for 4J1FS Malyt Vysotskij awaits additional documentation. More on this one in a future Special Report.

Sovereign Bases

The DXCC desk will accept the following ZC4 stations for credit for the British sovereign bases on Cyprus: ZC4AB AK AKR ASG AU AJ AVU AP BI BSG BR CB CI CN CS CT CW CZ DA DY DS DM DK DX EPI ES ESG EK EE FE GB GM GH HC HMS HS HA ID IK IO IT IM JB JE JH JK JU JV JA KF KU LC MR MT NL PC PM PW RAF RB RM RP RSJ RE SC SJ SS SB SR SH SV TEN TI TX TK TJ UHF VHF WD WW YC ZN and ZP, for contacts after August 16, 1960. ZC4AB, the ZC4 QSL bureau manager, reports that the following ZC4s have been active recently: ZC4AB AP DR DS DY FJ GP IM JA KM NC PW SH SV WP DX, and club stations ZC4EPI and ZC4ESB. Active ZC4 stations must indicate their presence on the base on their card to count for DXCC.

RTTY Report

- Tom Christian VR6TC has made a few RTTY contacts with his newly donated gear. Try 21087 kHz at 1730Z and 14087 kHz at 0430Z. Others say to watch 20 meters at 0330Z, and 15 at 0230Z.
- 6W6JX continues to be very active on weekends on both 15 and 20; QSL F6FNU. He hopes to be on as C56/6W6JX in the CQWW RTTY test.
- KX6OR likes ARQ. QSL Brian to Box 1005, Majuro, Marshall Islands 96960.
- Some Russian RTTY DXpeditions scheduled for September include UD6/UZ3PWX, RD/RW3PW, UD/UA3PW, and UD/UZ3PWX, the latter call planned for the RTTY test. Meanwhile UM9MWA hopes to operate from UI and UJ in the next few weeks.
- IØAOF is till trying to get permission to operate 1AØKM in the RTTY contest.
- And look for YI1BGD in Sept. by JR1AIB.
- Active RTTY stations include:

5B4MD 14088 kHz at 0400Z. UW9CY 14086 kHz at 0300Z.
UT5RP 14093 kHz at 2345Z. QSL Dmitry Slyusarenko, P.O.Box 300, Odessa 270000, USSR.
KH0/K4EQY 14088 kHz at 1350Z. QSL Paul at P.O.Box 209, Saipan MP 56590 USA.
J37ZY 14092 kHz at 0200Z. PJ2MI 14090 kHz at 0430Z.
UA9FM 14084 kHz at 0230Z. QSL Alex at P.O.Box 1601, Perm USSR.
